Hindi 

### ABOUT

I am an Android and Full Stack Developer focused on building clean, efficient, and scalable applications. I enjoy turning ideas into real-world solutions and continuously improving my skills through hands-on projects.

### PERSONAL PROJECTS/AWARDS & ACHIEVEMENTS

#### Projects

##### [Netra Sathi - LINK](#)

A companion app that connects to Netra Sathi hardware, enabling caregivers to monitor health, track location, prevent fraud, UPI payments and respond instantly to emergencies.

- Developed the caregiver companion mobile app using Flutter for real-time monitoring of visually impaired users
- Implemented live location tracking UI with route visualization using real-time data streams
- Built a secure remote payment verification interface to assist in fraud prevention workflows
- Added multi-language support to improve inclusivity across users
- Developed an emergency alert interface displaying live location, user status, and critical data instantly

##### [Fasal Vyapar - LINK](#)

Fasal Vyapar is a Flutter-based agricultural marketplace App enabling farmers to list products and shopkeepers to purchase seamlessly, with integrated ML-based crop, soil, disease, and freshness detection.

- Developed a Flutter-based marketplace app connecting farmers and shopkeepers for seamless trade
- Built inventory and order management system enabling real-time product listing, tracking, and sales
- Integrated crop and soil classification features using ML model outputs within the app
- Designed role-based dashboards to optimize experience for both farmers and buyers
- Integrated Razorpay payment gateway for secure and reliable digital transactions

#### Achievements

- Won MLH TRACK (ELEVEN LABS) at Diversion2K26
- 1st Runner up of Hackolution2k24 (12hrs open theme hackathon)
- Hack{o}Lution 2025 Special Mention Award
